Blend one part ska with one part punk, add a Latina twist and you have got yourself the tasty alternative sound known as La Muñeca y Los Muertos. This San Francisco band is rockin' steady with their own original ska music.

La Muñeca y Los Muertos came together in 2004 around Osorio's bilingual songwriting. Being that they have been friends for a long time prior to forming, the band came together naturally. With the combination of each of their talents, a selection of Osorio's songs matured into their distinct Ska/Punk/Latin sound that is heard on their recent album release, Estrella.

Osorio's songwritings are playful journeys of self-discovery and self-encouragement. Finding inspiration in spirit, nature, positivity, celebration and in the appreciation of life. Some of their musical influences are The Specials, Oingo Boingo, The Pixies, Madness, Bersuit, Mana, and Elvis Costello. And many No Doubt and The Selecter fans have made La Muñeca y Los Muertos one of their new favorites.

Currently, La Muñeca y Los Muertos perform locally in the San Francisco Bay Area. Near future goals include connecting with booking and management, touring with other well known bands, music video making and beginning work on a new record.
